CANOPY partners

# Radiology Partners' AI Program

Designed, implemented and supported by Canopy Partners, the IT Services Division of Radiology Partners

The value in having a comprehensive AI program—not simply a product—is that a program has been strategically compiled and clinically integrated to improve healthcare outcomes and drive return on investment. The Canopy Partners Radiology AI program allows health systems to expand their IT portfolio in a way that is integrated with clinicians and IT/workflow, while keeping their internal resources dedicated to the patient experience and allowing the partner to implement and manage the AI life cycle.

## Value for Patients

✓ Increased speed and accuracy to diagnosis

✓ Second set of eyes for increased confidence in diagnosis through treatment

✓ New algorithms are being continuously researched, validated, and added to the program

✓ Large scale validation of all algorithms to ensure high clinical performance

## Value for Care Teams

✓ Improved patient management through coordinated acute and non-acute care

✓ Coordination of care across specialties to facilitate communication

✓ Decreased length of stay with improved clinical outcomes

✓ Support existing service line clinical programs or enable new ones using RP's AI solutions

## Value for Health Systems

✓ Increased patient capture/retention

✓ Measurable ROI demonstrated by leading health systems

✓ First mover advantage in your market with opportunity to maintain a clinical edge on the competition

✓ Alignment from RP as a true stakeholder who is fully invested in delivering the best AI solutions

# A One-Stop-Shop Approach to Imaging AI

Canopy Partners is a privately held healthcare technology company that provides innovative solutions for hospitals and health systems around the country. We offer a full spectrum of imaging IT solutions designed to enhance patient care and reduce costs.

## We Are the Right Partner for Radiology AI

- ✓ AI program seamlessly embeds into current workflow
- ✓ Change management & adoption assistance to maximize impact of technology
- ✓ National scale enables attractive pricing for our partners
- ✓ Proven clinical value and return on investment
- ✓ Potential to reduce medical malpractice risks and liability
- ✓ No-risk early adopter program

## As Your Trusted Partners, We Are Responsible for:

- ✓ Single point of contact
- ✓ Implementation
- ✓ Systems integration
- ✓ Training & user adoption
- ✓ Optimization & utilization
- ✓ Data validation and revalidation
- ✓ Oversight & accountability
- ✓ Support (24x7x365)

# Transforming Healthcare Using a Comprehensive AI Program

### Curated Algorithms

There are dozens of companies trying to develop algorithms and get products FDA cleared to market, but who is thinking about effectively integrating these into the radiology workflow? This is what makes us different.

### Validate & Revalidate

We validate algorithms across patient data sets, different EMR and IT environments to make sure the results are reliable. Then, we continue to revalidate the data to make sure the data doesn't drift.

### IT Implementation

Our experienced team walks alongside clients from concept to implementation of integrated technology solutions.

### Training & Change Management

AI is still new in health systems, and there is not a lot of experience with implementation or resources. We can help train your radiologists, techs, referring physicians and care navigators.

### IT Support 24/7/365

We offer ongoing support when you need it. By filling that gap, we allow your team to continue with your core business, requiring less additional FTE hires.

### Manage Multiple Vendors

We manage multiple vendors behind the scenes, seeking to create an integrated environment for clinical users. When technical issues arise, we provide you with a single point of contact for support.

### Care Coordination & Follow-Up

We monitor effective communication and provide follow-up support after hospital discharge, resulting in better patient outcomes and less leakage.

### Customer Success Management

We're dedicated to providing continued support that helps the AI program succeed, including a roadmap for the future with new technology advancements.

## Transforming Radiology to Accelerate the Quadruple Aim

Improve the Patient
Experience

Improve the Staff
Experience

Reduce the Cost of
Healthcare

Improve Health of
the Population

## AI Acute Care Suite Benefits:

✓ Triages and prioritizes care

✓ Improves diagnostic accuracy reducing length
of stay by 1–2 days (for PE and stroke)

✓ Provides compelling financial ROI

✓ Is a powerful marketing tool for your patients
and referring community

By incorporating an AI program in your
practice, you can drive transformation and
raise the standard of patient care.
